

# If you can't fix it, it can't be fixed.

HEATING AND VENTILATION SYSTEMS, motors and control gear – there's a lot to go wrong, but there's one person who knows how to put it right. You. You understand what makes property plant systems tick. And you intuitively know how to get them working again. So if you are a graded engineer who has completed a registered apprenticeship, we'd love to hear from you. You must be good with people as well as plant, and be organised as well as presentable. You'll be working within our Facilities Management team, so if you have experience using a CAFM system, that would be a big plus. A company van is provided, so a clean driving licence is essential. Apply today, and fix a great career for yourself.
